CENTRAL RAILWAY  
BOMBAY - 400 027.

TO WHOM IT MAY CONCERN

Sub: ROOF TOP SAFE WALK LADDERS.

The system of ROOF TOP SAFE WALK LADDER has been to be very useful and successful on this Sub-division. We highly recommend that this system is quite safe and easy as it is off its own kind.

It is a life-protector for the staff working over the AC-Sheet roof which cannot withstand to the load impact of the workers. This system is quite useful as it distributes the load evenly to all the points.

The workers gain more confidence after working on this system as it does not involve any risk of life.

It is light in weight and easy to carry.

It reduces the time factor and economical too. With high workmanship, the output appears to be on the high side.

No recurring expenditure is involved on the maintenance of this system.

It is easy to understand and easy to implement.

During rainy season also this system can be adopted.

This has an Indian Patent Under No.147751.

It is felt necessity to have 3 sets for each IOWs Unit.

Under the provisions of Factories Act, 1948 and amended in 1986, it is mandatory to make use of safety device and the responsibility lies with the Occupier and the Manager even in the case of job allotted through a contract system.
