and OF/FYS.

SUB : ROOF TOP SAFETY SYSTEM.

Ref : Our letter No. 205/COS/TS/MISC,
dated 15.09.1989.

M/s. Fabricare, 1187/25 Ghole Road, Pune-411005 (Maharashtra) have developed a system which consists of special aluminium ladders and half ladders with the help of which workers can safely walk over asbestos sheet roofs during erection and subsequent maintenance. The ladders can be used along or across the corrugation. As intimated earlier vide letter referred above the usage of these ladders will reduce/eliminate accidents due to fall from the roofs. It is understood from the firm that some Ordnance Factories viz., C.F.Katni, MPF, C.F.Ambajhari have already procured the subject item.

02. Further under the provision of factories Act, 1948 and amended in 1986, it is mandatory to make use of safety device and the responsibility lies with the occupier and the Manager even in the case of job ordered through contract system. You may therefore, please contact the firm to arrange for a live practical demonstration (free of cost) regarding usage of roof top system and also screening of a video film on the subject.

03. You may therefore, workout your requirements if any, and consider procurement of the system for repair and maintenance of buildings in the factory and estate to prevent accidents and for increasing the efficiency.
